Desde 1962 fabricando herrajes

Desde 1962, en Estampaciones EBRO, hemos apostado por la fabricación de calidad, la innovación, el desarrollo de nuevos productos y sobre todo el buen servicio y trato a sus clientes.

La inversión en maquinaria de última generación, la alta preparación de nuestro equipo humano, la fabricación propia de nuestras matrices y utillajes, el control de producción y calidad de nuestra fabricación y nuestro stock de producto terminado, nos permiten dar una rápida solución a los diferentes productos, tanto estándar como a medida, demandados a nivel mundial.

PO

Fabricando ferragens desde 1962

Desde 1962 Estampaciones Ebro, apostamos pela fabricação de qualidade, a inovação, o desenvolvimento de novos produtos e sobre tudo o bom serviço e trato aos clientes.

A inversao em maquinarias de ultima geração, a alta preparação da nossa equipa humana, a fabricação própria das nossas matrizes e ferramentas, o control de produção e qualidade da nossa fabricação e nosso stock de produto acabado permitem-nos dar uma rápida solução aos diferentes produtos, tanto standard como a medida, demandados a nível mundial.

EN

Hardware manufacturer since 1962

Since 1962 Estampaciones EBRO's has been manufacturing high quality fittings. Our main goals have always been high quality production, innovation, development of new products and specially a good service to our customers.

The investment in the latest machinery, the manufacture of our own moulds and tools, the production control and the quality control and our warehouse of finished products we give fast solutions to the different demanded products (standard and tailor-made products) all over the world.

FR

Fabricant de ferrures depuis 1962

Depuis 1962 Estampaciones EBRO parie sur la fabrication de qualité, l'innovation et le développement de nouveaux produits, et surtout sur le bon service à ses clients.

L'investissement en machines de dernière génération, l'adéquate préparation de notre équipe humaine, la fabrication propre de nos matrices et outillages, le contrôle de la production et qualité de nos fabriqués, et notre gros stock de produit fini, nous permettent de donner une solution très rapide aux demandes à l'échelle mondiale, pas seulement de produits standard mais aussi sur mesure.

ES Ubicación estratégica

Nuestra fábrica y oficinas se encuentran localizadas en la Puebla de Alfindén, Zaragoza; estratégicamente ubicadas entre Madrid, Barcelona, Valencia y Bilbao, principales capitales y puertos españoles.

PO Localização estratégica

A nossa fábrica e os nossos escritórios estão situados na Puebla de Alfindén, Zaragoza; localização estratégica entre Madrid, Barcelona, Valencia e Bilbao, principais portos de Espanha.

EN Strategic location

Our factory and offices are located in La Puebla de Alfindén, Zaragoza, Spain; strategically located between Madrid, Barcelona, Valencia and Bilbao, the main Spanish capitals and ports.

FR Emplacement stratégique

Desarrollo de Software propio

Colaboramos con el Centro Politécnico Superior de Zaragoza en la elaboración de estudios sobre criterios de seguridad para nuestros fabricados, además del desarrollo de un software propio.

Este software nos permite, conociendo las características básicas de una puerta, como son su peso y sus dimensiones, proponer la solución óptima:

1. Qué elementos debe colocar (tipo y tamaño).
2. Y a qué distancias fijarlos, para que habiendo determinado por nuestra parte un coeficiente de seguridad suficientemente alto como para poder absorber incluso el efecto de la fatiga, nuestro cliente coloque los herrajes con la seguridad y tranquilidad de que en perfectas condiciones de instalación, uso y mantenimiento no tenga problemas por resistencia.

PO

Desenvolvimento de um software próprio

estebro® colabora com o Centro Politécnico Superior de Zaragoza na elaboração de estudos sobre as critérios de seguridade para os nossos fabricados, além de o desenvolvimento de um software próprio.

Com as características básicas de uma porta, como são o suo peso e as suas dimenções, este software premite-nos propor a solução ótima:

1. Que elementos deve colocar (tipo e tamanho).
2. E a que distâncias fixarlos; para que tendo a determinação por parte nossa, de um coeficiente de seguridade o suficiente alto para poder absorver inclusive o efeito da fadiga, o nosso cliente possa colocar as ferragens com a seguridade e tranquilidade de não ter problemas de resistência em perfeitas condições de istalação, uso e manutenção.

EN

Development of our own software

We cooperate with the University of Zaragoza in the development of different studies about security standards for our manufactures, we also have developed itown original software.

Knowing the basic characteristics of a door, such us its weight and dimension, the software developed allows us to obtain:

1. The distribution of hinges throughout the edge of the door.
2. Calculate the maximum weight held by the hinges with a high security coefficient, calculate the number of hinges per door, the most adequate hinge depending on the door's weight and simulate the possible deformations in extreme cases.

FR

Développement d'un logiciel propre

Nous collaborons avec le Centre Polytechnique Supérieur de Zaragoza pour élaborer des études sur critères de sécurité pour nos fabriquéés, ainsi que pour le développement d'un logiciel propre.

Ce logiciel nous permet, en connaissant les caractéristiques basiques de la porte (poids et dimensions):

1. De proposer les ferrures à installer (type et mesure).
2. Et la distance entre les éléments, avec un coefficient de sécurité qui peut absorber l'effet de la fatigue de la porte. De cette façon, notre client peut être sûr que, avec des conditions d'installation, usage et maintenance parfaites, sa porte n'aura pas des problèmes de résistance.

ES Estebro garantía de fabricante, asesoramiento directo

Desde Estebro colaboramos con el Centro Politécnico Superior de Zaragoza en la elaboración de estudios sobre criterios de seguridad para nuestros fabricados.

En 2006 y 2008 desarrollamos nuestros estudios de seguridad y con ellos un software propio, el cual nos permite asesorar a todos los consumidores de nuestra marca en la óptima colocación de nuestros fabricados.

PO Estebro garantia de fabricante, asesoramiento directo

Estebro colabora com o Centro Politécnico Superior de Zaragoza na elaboração de estudos sobre as critérios de segurança para os nossos fabricados

Em 2006 e 2008 desenvolvimos os nossos estudos de segurança e com elles um software próprio, que permite-nos assessorar a todos os consumidores da nossa marca ótima colocação dos nossos fabricos.

EN Estebro, manufacturer's guarantee, direct technical advice

Estebro cooperates with the University of Zaragoza in the development of different studies about security standards for our manufactured products.

In 2006 and 2008 we developed our own studies about security standards as well as our own software. This software allows us to give technical advice about the ideal installation of our products.

FR Estebro, garantie de fabricant, conseil technique direct

Estebro collabore avec le Centre Polytechnique Supérieur de Zaragoza pour élaborer des études sur critères de sécurité pour ses fabriqués.

En 2006 et 2008 nous avons développé nos études de sécurité et un logiciel propre, qui nous permet d'offrir notre meilleur conseil sur l'installation de nos produits à tous les consommateurs de notre marque

Software Estebro

ES Nuestro estudio/software nos permite obtener:

- ✓ La óptima distribución de pernios y bisagras a lo largo de la puerta.
- ✓ Número de pernios y bisagras por puerta.
- ✓ Sabiendo el peso de la puerta y sus dimensiones, nos proporciona el tipo de pernio o bisagra mas adecuado.
- ✓ Simular deformaciones para casos extremos
- ✓ Asesorar sobre la colocación del resto de nuestros productos

PO O nosso estudo/software permite-nos obter:

- ✓ A ótima distribuição de pernos e dobradiças ao longo da porta.
- ✓ Número de pernos e dobradiças por porta.
- ✓ Se conhecemos o peso da porta e as suas dimenções, proporciona o tipo de perno ou dobradiça mais adequado.
- ✓ Simular deformações para casos extremos.
- ✓ Assessorar sobre a colocação do resto dos nossos produtos.

EN Our software allows us to obtain:

- ✓ The optimal distribution of the hinges along the door.
- ✓ The number of hinges per door.
- ✓ The most adequate hinge to install, depending on the weight and door's dimensions.
- ✓ Simulate the possible deformations in extreme cases.
- ✓ Give advice about the installation of other estebro's products.

FR Le logiciel nous permet de savoir:

- ✓ La meilleure position des charnières ou paumelles tout au long de la porte.
- ✓ La quantité de paumelles ou charnières à utiliser.
- ✓ Sachant le poids et dimensions de la porte, le type de paumelles ou charnières le plus adéquate.
- ✓ La simulation des possibles déformations pour des cas extrêmes.
- ✓ Donner conseil sur l'installation des autres produits estebro.

¿Nudo o gota? » Diferencias de soldadura entre perfil nudo y perfil gota

Nó ou gota? » Diferenças de solda entre perfil nó e perfil gota

Round or drop? » Differences between: drop profile hinges and round profile

Profil rond ou profil goutte? » Différences de soudure entre le profil rond et le profil goutte

ES La geometría del perfil gota facilita la soldadura alejando la zona térmica afectada del eje y evitando así el posible gripaje del pernio.

PO A geometria do perfil gota facilita a soldadura afastando a zona térmica do eixo, evitando assim o possível retesamento do perno.

EN The geometry of the drop profile hinge facilitates the welding, spacing out the thermal zone of the axle affected, avoiding the possible seize of the hinge.

FR La géométrie du profil goutte facilite le soudage en écartant la zone thermique affectée de l'axe. De cette façon, on évite le grippage de la paumelle.

Nudo | Nó | Round | Rond

Gota | Drop | Goutte

¿Izquierda o derecha? » Algunos pernios tienen mano

Esquerda ou direita? » Significado das “mãos” no perno pá tampa

Left or right? » Flag hinge with cover. Meaning of the hands

Gauche ou droite? » La charnière roulée a “main”

Dcha
A direita
Right
A droite

Izq
A esquerda
Left
A gauche

ES

Se llama pernio de “mano derecha”, a aquellas bisagras que al abrir la puerta empujando quedan a la derecha.

PO

Chama-se perno de “mão direita” a aqueles que quando a porta se abre, empurrando quedam á direita.

EN

“Right hand” hinges: Are the hinges that you find on the right side of the door when you open it. “Left hand” hinges: Are the hinges that you find on the left side of the door when you open it.

FR

On appelle charnière ou paumelle à “main droite” aux charnières qui, en poussant la porte, restent à droite.

Por el contrario, se llama pernio de “mano izquierda”, a aquellas bisagras que al abrir la puerta empujando quedan a la izquierda.

Por o contrario, chamase perno de “mão esquerda”, a aqueles que quando a porta se abre, empurrando quedam á esquerda.

Fixing recommendations:

Always weld the lower flag to the frame of the door; the lower flag operates as the pin since it is the one that supports the weight of the door.

Par contre, on appelle charnière ou paumelle à “main gauche” aux charnières qui, en poussant la porte, restent à gauche.

Además, para aclarar su colocación, indicar que la pala inferior va siempre soldada al marco, ya que es la que hace la función del macho soportando el peso de la puerta.

Ademais, para aclarar a sua colocação, indicar que a pá inferior vai sempre soldada ao marco, já que é a que faz a função do macho suportando o peso da porta.

En plus, pour préciser son installation, la partie inférieure doit être soudée à l'encadrement de la porte, puisqu'elle fait fonction de mâle en supportant le poids de la porte.

35IZ	25x125 Izda. A esquerda/Left A gauche	121,5	60,5	25	2	0,81

¿Sabe cómo se coloca el pernio nudo con muelle?

Sabe você colocar o perno mola?
Do you know how to install the spring hinge?
Vous savez comment installer la paumelle avec ressort?

ES

- Elegir correctamente la referencia a colocar dependiendo del tipo de puerta.
 - Cod. 34D, si al abrir la puerta empujando, los pernios quedan situados a la derecha.
 - Cod. 34IZ, si al abrir la puerta empujando, los pernios quedan situados a la izquierda.
- Soldar el pernio, sujetando la parte fija al marco de la puerta y la parte regulable a la hoja, de modo que el tornillo B quede accesible para poder maniobrar sobre él (llave allen 2,5 mm).
- Una vez colocada la puerta, se afloja el tornillo B. Actuando sobre el tornillo A (llave allen 6 mm) se tensiona el muelle, eligiendo de las 5 posiciones posibles aquella que tenga la fuerza suficiente para generar el auto-cierre de la puerta.
- Esta posición se fija apretando el tornillo B. El pernio queda perfectamente instalado.

EN

- Choose the correct code according to the sort of door.
 - Cod. 34D. When opening the door by pushing, the hinges are placed on the right hand.
 - Cod. 34IZ. When opening the door by pushing, the hinges are placed on the left hand.
- Weld the hinge to the door holding the fixed part to the frame door and the regulating part to the door so the B pin will be accessible to handle it.
- Once the door is fixed, loosen the B screw and use the A screw (allen key 6 mm) to tighten the spring. Choose from the 5 positions that the hinge has, the one that has enough strength to generate the self-closure of the door, once the door is fixed tighten the B screw.
- This position will be fixed by tightening the B screw. The hinge is now perfectly installed.

PO

- Escolha corretamente a referência a colocar segundo o tipo de porta.
 - Cod. 34D se abrindo a porta puxando, os pernos ficam situados á direita
 - Cod. 34IZ se abrindo a porta puxando, os pernos ficam situados á esquerda
- Soldar o perno, sujeitando a parte fixa ao marco da porta e a parte regulável á folha de modo que o parafuso B fique acessível para poder lho manipular (chave Allen 2,5mm)
- Uma vez colocada a porta, afrouxe o parafuso B. Atuando sobre o parafuso A (chave allen 6 mm) esticase a mola, escolhendo das 5 posições possíveis aquela que tenha a força suficiente para gerar o autofecho da porta.
- Esta posição se fixa apertando o parafuso B. O perno fica perfeitamente instalado.

FR

- Choisissez correctement la référence à installer en dependant de la main de la porte:
 - Cod. 34D "main droite", quand en poussant la porte les paumelles restent à droite.
 - Cod. 34IZ "main gauche", quand en poussant la porte les paumelles restent à gauche.
- Souder la partie fixe de la paumelle à l'encadrement et la partie réglable à la porte, de façon que l'axe B (tornillo B) soit accessible pour pouvoir agir sur lui (clef allen 2,5 mm).
- Une fois la porte est installée, on peut enlever l'axe B. Si on agit sur la vis A (tornillo A) avec une clef Allen de 6 mm on tensionne le ressort, en choisissant entre les 5 positions possibles celle qui ait la force suffisant pour générer l'autofermeture de la porte.
- On fixe la position choisie en plaçant à nouveau l'axe B. Et la paumelle reste parfaitement installée.

Pernio gota con muelle | Familia 33

Perno gota com mola
Drop profile hinge with spring
Paumelle profil goutte avec ressort

Cod.	Medidas Dimensions		
276	22x250	8	4,55

¿Sabe cómo se coloca el pernio gota con muelle?

Sabe você colocar o perno gota com mola?
Do you know how to install the drop profile hinge with spring?
Vous savez comment installer la paumelle profil goutte avec ressort?

ES

1. Soldar el pernio sujetando la parte fija al marco de la puerta y la parte regulable a la hoja, de modo que el espárrago B quede accesible para poder maniobrar sobre él.
2. Una vez colocada la puerta, se suelta el espárrago B. Actuando sobre el tornillo A (Llave Allen 6 mm) se tensiona el muelle, eligiendo de las 5 posiciones posibles aquella que tenga la fuerza suficiente para generar el autocierre de la puerta.
3. Esta posición se fija colocando de nuevo el espárrago B. El pernio queda perfectamente instalado.

PO

1. Soldar o perno sujetando a parte fixa ao marco da porta e a parte regulável á lamina, de modo que o passador B fique acessível para poder manobrar sobre ele.
2. Uma vez colocada a porta, se solta o passador B. Atuando sobre o parafuso A (chave Allen 6 mm.) se estica a mola, escolhendo das 5 posições possíveis aquela que tenha a força suficiente para gerar o auto fecho da porta.
3. Esta posição se fixa colocando mais uma vez o passador B. O perno fica perfeitamente instalado.

EN

1. Weld the hinge holding the fixed part to the door frame and the adjustable part to the door, so the B pin will be accessible to handle it.
2. Once the door is fixed release the B pin. Use the A screw in order to apply pressure on the spring (allen key 6 mm), choose from the 5 possible positions that the spring has, the one that has enough strength to make the door close by itself (self-closing).
3. Fix the position chosen by fixing the B pin.

FR

1. Souder la partie fixe de la paumelle à l'encadrement et la partie réglable à la porte, de façon que l'axe B (espárrago B) soit accessible pour pouvoir agir sur lui.
2. Une fois la porte est installée, on peut enlever l'axe B. Si on agit sur la vis A (tornillo A) avec une clef Allen de 6 mm on tensionne le ressort, en choisissant entre les 5 positions possibles celle qui ait la force suffisant pour générer l'autofermeture de la porte.
3. On fixe la position choisie en plaçant à nouveau l'axe B. La paumelle reste parfaitement installée.

Novedoso diseño creado para cumplir con las exigencias anti-atrapamiento y anti-descarrilamiento de la norma UNE-EN 13241-1

- ES**
- ✓ Mayor resistencia a la corrosión: tornillería con tratamiento anti-corrosión.
 - ✓ Cincado de la polea grado 3.
 - ✓ Encastrar en un perfil cuyo ancho interior es superior a 30 mm.
 - ✓ Válido para: madera, PVC, aluminio.

- PO**
- ✓ Maior resistência a corrosão : Parafusos com tratamento anti-corrosão.
 - ✓ Zincado da polia grau 3.
 - ✓ Encaixar num perfil cuja largura interior é superior a 30mm.
 - ✓ Válido para: madeira, PVC, alumínio.

- EN**
- ✓ Higher resistance to corrosion: the screws have an anti-corrosion treatment.
 - ✓ Zinc-coated degree of the wheel: 3.
 - ✓ To embed in a profile with an interior width higher than 30 mm.
 - ✓ Suitable for: wood, PVC, aluminium.

- FR**
- ✓ Meilleure résistance face à la corrosion: visserie avec un traitement anti-corrosion.
 - ✓ Zingage des roues grade 3.
 - ✓ Pour encastrer dans un profil dont la largeur intérieure est supérieure a 30 mm.
 - ✓ Valable pour: bois, PVC, aluminium.

Polea Caja Ø60 | Familia 96

ES

Colocando las abrazaderas de sujeción cada 500 mm, y suponiendo una apertura y cierre media de 8 veces al día durante 260 días al año, estos herrajes están diseñados y ensayados para una duración aproximada de 20 a 25 años.

Se recomienda revisar las uniones de las abrazaderas al menos una vez cada seis meses, verificando que se encuentran en perfectas condiciones.

PO

Colocando as abraçadeiras de sujeição cada 500 mm, e supondo uma abertura e um fecho de 8 vezes o dia durante 260 dias ao ano, estas Ferragens são desenhadas e ensaiadas para uma duração aproximada de 20 a 25 anos.

Recomendamos revisar as unioes das abraçadeiras por lo menos uma vez cada seis meses, verificando que se encontram em perfeitas condições.

EN

Installing the rail supports every 500 mm, and assuming an opening and closing average of 8 times a day during 260 days a year, our fittings are designed and tested for an estimated durability of around 20 or 25 years.

It is recommended to check the joints of the rail support at least once every six months, verifying that they are in perfect conditions.

FR

Ces ferrures, installées avec les supports de fixation chaque 500 mm et en calculant une ouverture et fermeture moyenne de 8 fois par jour pendant 260 jours par an, sont dessinées et testées pour une durée approximative de 20 à 25 ans.

On recommande de réviser les jonctions des supports au moins une fois chaque six mois, en vérifiant qu'elles sont en bon état.

ES Dos modelos de puertas correderas plegables solapadas hasta un peso máximo por hoja de 100 kg.

Es una solución que combina una apertura de gran luz, con la posibilidad de tener portillo, consiguiendo reducir el espacio ocupado en posición de apertura.

EN Two types of sliding doors with overlapping panels with a maximum weight per panel of 100 kg.

It is a solution that combines a wide opening length with the possibility of having a gate, managing to reduce the space when the door is open.

PO Dois modelos de portas corredeiras dobráveis solapadas até um peso máximo de 100 kg por folha.

É uma solução que combina uma abertura de grande luz com a possibilidade de ter portilha, conseguindo reduzir o espaço ocupado em posição de abertura.

FR Deux modèles de portes coulissantes pliantes à panneaux superposés avec un poids maximal de 100 kg par panneau.

Cette solution permet de combiner une ouverture de très grande largeur et la possibilité d'avoir un portillon, et réduire de cette façon l'espace occupé en position d'ouverture.

ES Para puertas pesadas de más de 400 kg, es recomendable colocar una abrazadera suplementaria.

PO Para portas pesadas de mais de 400 kg é recomendável colocar uma abraçadeira suplementaria.

EN For heavy duty doors of more than 400 kg it is recommended to install an extra rail support.

FR Pour portes lourdes de plus de 400 kg, il est recommandable d'installer un support pour rail supplémentaire.

ES Para un buen funcionamiento, la anchura de las hojas no debe exceder los 900 mm.

PO Para um bom funcionamento, a largura das folhas não deve exceder os 900mm.

EN For a good operation the wide of the panels should not be more than to 900 mm.

FR Pour un bon fonctionnement, la longueur des panneaux ne doit pas excéder de 900 mm.

ES Los pernios deben estar bien alineados entre si para conseguir una correcta articulación de las hojas.

PO As dobradiças devem estar alinhadas entre si para conseguir uma correta articulação das folhas.

EN The hinges should be perfectly lined-up between them for a correct articulation of the panels.

FR Les paumelles doivent être bien alignées pour obtenir une articulation correcte des panneaux.

ES El guiador inferior es indispensable para el buen funcionamiento.

PO A guia inferior é indispensável para o bom funcionamento.

EN The bottom guide is indispensable for its proper working system.

FR Le guide inférieur est indispensable pour le bon fonctionnement.

ES

Colocando las abrazaderas de sujeción cada 500 mm, y suponiendo una apertura y cierre media de 8 veces al día durante 260 días al año, estos herrajes están diseñados y ensayados para una duración aproximada de 20 a 25 años.

Se recomienda revisar las uniones de las abrazaderas al menos una vez cada seis meses, verificando que se encuentran en perfectas condiciones.

EN

Installing the rail supports every 500 mm, and assuming an opening and closing average of 8 times a day during 260 days a year, our fittings are designed and tested for an estimated durability of around 20 or 25 years.

It is recommended to check the joints of the rail support at least once every six months, verifying that they are in perfect conditions.

PO

Colocando as abraçadeiras de sujeição cada 500 mm, e supondo uma abertura e um fecho de 8 vezes o dia durante 260 dias ao ano, estas Ferragens são desenhadas e ensaiadas para uma duração aproximada de 20 a 25 anos.

Recomendamos revisar as unioes das abraçadeiras por lo menos uma vez cada seis meses, verificando que se encontram em perfeitas condições.

FR

Ces ferrures, installées avec les supports de fixation chaque 500 mm et en calculant une ouverture et fermeture moyenne de 8 fois par jour pendant 260 jours par an, sont dessinées et testées pour une durée approximative de 20 à 25 ans.

On recommande de réviser les jonctions des supports au moins une fois chaque six mois, en vérifiant qu'elles sont en bon état.

100 kg

ES Dos modelos de puertas correderas plegables solapadas hasta un peso máximo por hoja de 100 kg.

Es una solución que combina una apertura de gran luz, con la posibilidad de tener portillo, consiguiendo reducir el espacio ocupado en posición de apertura.

Para un buen funcionamiento, la anchura de las hojas no debe exceder los 900 mm.

EN Two types of sliding doors with overlapping panels with a maximum weight per panel of 100 kg.

It is a solution that combines a wide opening length with the possibility of having a gate, managing to reduce the space when the door is open.

For a good operation, the wide of the panels should not be superior to 900 mm.

PO Dois modelos de portas corredeiras dobráveis solapadas até um peso máximo de 100 kg por folha.

É uma solução que combina uma abertura de grande luz com a possibilidade de ter portilha, conseguindo reduzir o espaço ocupado em posição de abertura.

Para um bom funcionamento, a largura das folhas não deve exceder os 900 mm.

FR Deux modèles de portes coulissantes pliantes à panneaux superposés avec un poids maximal de 100 kg par panneau.

Cette solution permet de combiner une ouverture de très grande largeur et la possibilité d'avoir un portillon, et réduire de cette façon l'espace occupé en position d'ouverture.

Pour un bon fonctionnement, la longueur des panneaux ne doit pas excéder de 900 mm.

ES Para puertas pesadas de más de 400 kg. es recomendable colocar una abrazadera suplementaria.

PO Para portas pesadas de mais de 400 kg é recomendável colocar uma abraçadeira suplementaria.

EN For heavy duty doors of more than 400 kg it is recommended to install an extra rail support.

FR Pour portes lourdes de plus de 400 kg, il est recommandable d'installer un support pour rail supplémentaire.

ES Las bisagras deben estar bien alineadas entre si para conseguir una correcta articulación de las hojas.

PO As dobradiças devem estar alinhadas entre si para conseguir uma correta articulação das folhas.

EN The hinges should be perfectly lined-up between them for a correct articulation of the panels.

FR Les paumelles doivent être bien alignées pour obtenir une articulation correcte des panneaux.

ES El guiador inferior es indispensable para el buen funcionamiento.

PO A guia inferior é indispensável para o bom funcionamento.

EN The bottom guide is indispensable for a good operation of the door.

FR Le guide inférieur est indispensable pour le bon fonctionnement.
